Author Index of Volume 82

Subject Index of Volume 82

Acceptor complexes
photoinduced electron transfer in linked transition metal donor–acceptor complexes, 181
Artificial intelligence
an artificial intelligence search for key residues in protein electron transfer systems, 117

Bacterial reaction centers
on the energetics of the primary electron-transfer process in bacterial reaction centers, 123

Charge transfer
photophysical and photochemical behaviour of ((*N*,*N*-dimethylamino)methyl)styrenes, 129
Covalently linked systems
photoinduced energy and electron transfer in inorganic covalently linked systems, 191
Cyclization
photoinduced electron transfer (PET) in organic synthesis. [3+2]-Type cycloaddition, cyclization and C–C bond cleavage reactions, 219
Cycloaddition
photoinduced electron transfer (PET) in organic synthesis. [3+2]-Type cycloaddition, cyclization and C–C bond cleavage reactions, 219

Donor–acceptor systems
electron transfer and intramolecular radiationless transitions, 5
photophysics of linked donor–acceptor systems: through-space and through-bond interactions, 171
Donor–bridge–acceptor systems
rigid donor–bridge–acceptor systems: photoinduced charge transfer in solution and in a supersonic jet, 161

Effective electronic coupling
resonances and interference effects on the effective electronic coupling in electron transfer, 81
Electron transfer
reflections on early days in electron transfer, 1
electron transfer and intramolecular radiationless transitions, 5
some new perspectives on electron transfer reactions through the intersecting-state model, 11
electron transfer and energy transfer through bridged systems. III. Tight-binding linkages with zero or non-zero asymptotic band gap, 31
calculation of the electronic factor, 61
resonances and interference effects on the effective electronic coupling in electron transfer, 81
electron transfer rates from time-dependent correlation functions. Wavepacket dynamics, solvent effects, and applications, 87
on the energetics of the primary electron-transfer process in bacterial reaction centers, 123
kinetics of the electron transfer reaction between ^{3}ZnTPP* and methyl viologen in lecithin vesicles studied by global analysis, 149
photoinduced energy and electron transfer in inorganic covalently linked systems, 191
new perspectives on long-range electron transfer in conformationally organized peptides and electron-transfer proteins: an experimental approach, 203
Electron transport
electron transport networks in multicentre metalloproteins, 103
Energy transfer
electron transfer and energy transfer through bridged systems. III. Tight-binding linkages with zero or non-zero asymptotic band gap, 31
Exciplex fluorescence
photophysical and photochemical behaviour of ((*N*,*N*-dimethylamino)methyl)styrenes, 129
Excited state
twisted intramolecular charge transfer dynamics in polar solvents, 67
photophysical and photochemical behaviour of ((*N*,*N*-dimethylamino)methyl)styrenes, 129
novel intermolecular and intramolecular photochemical reactions initiated by excited state single electron transfer processes, 211

Interference effects
resonances and interference effects on the effective electronic coupling in electron transfer, 81
Intersecting-state-model
some new perspectives on electron transfer reactions through the intersecting-state model, 11
Intersystems electron transfer
kinetics of return intersystem electron transfer in triplet radical ion pairs in solution and on silica. Surface effect on bell-shaped energy-gap dependence, 137
Intramolecular radiationless transitions
electron transfer and intramolecular radiationless transitions, 5

Kinetics
kinetics of return intersystem electron transfer in triplet radical ion pairs in solution and on silica. Surface effect on bell-shaped energy-gap dependence, 137
kinetics of the electron transfer reaction between ^{3}ZnTPP* and methyl viologen in lecithin vesicles studied by global analysis, 149

Lecithin
kinetics of the electron transfer reaction between ^{3}ZnTPP* and methyl viologen in lecithin vesicles studied by global analysis, 149

Metal–ligand coupling elements
metal–ligand and metal–metal coupling elements, 47
Metalloproteins
electron transport networks in multicentre metalloproteins, 103

Elsevier Science S.A.

Metal–metal coupling elements
metal–ligand and metal–metal coupling elements, 47
Methyl viologen
kinetics of the electron transfer reaction between ^{3}ZnTPP* and methyl viologen in lecithin vesicles studied by global analysis, 149

Orbital energy
calculation of the electronic factor, 61
Organic synthesis
photoinduced electron transfer (PET) in organic synthesis. [3+2]-Type cycloaddition, cyclization and C–C bond cleavage reactions, 219

Peptides
new perspectives on long-range electron transfer in conformationally organized peptides and electron-transfer proteins: an experimental approach, 203
Photoinduced charge transfer
rigid donor–bridge–acceptor systems: photoinduced charge transfer in solution and in a supersonic jet, 161
Photoinduced electron transfer
photoinduced electron transfer in linked transition metal donor–acceptor complexes, 181
photoinduced electron transfer (PET) in organic synthesis. [3+2]-Type cycloaddition, cyclization and C–C bond cleavage reactions, 219
Photoinduced energy transfer
photoinduced energy and electron transfer in inorganic covalently linked systems, 191
Protein electron transfer
an artificial intelligence search for key residues in protein electron transfer systems, 117
Proteins
new perspectives on long-range electron transfer in conformationally organized peptides and electron-transfer proteins: an experimental approach, 203

Resonance
resonances and interference effects on the effective electronic coupling in electron transfer, 81

Single electron transfer processes
novel intermolecular and intramolecular photochemical reactions initiated by excited state single electron transfer processes, 211
Solvent effects
electron transfer rates from time-dependent correlation functions. Wavepacket dynamics, solvent effects, and applications, 87
Supersonic jet
rigid donor–bridge–acceptor systems: photoinduced charge transfer in solution and in a supersonic jet, 161

Through-bond interactions
photophysics of linked donor–acceptor systems: through-space and through-bond interactions, 171
Through-space interactions
photophysics of linked donor–acceptor systems: through-space and through-bond interactions, 171
Tight-binding linkages
electron transfer and energy transfer through bridged systems. III. Tight-binding linkages with zero or non-zero asymptotic band gap, 31
Time-dependent fluorescence
twisted intramolecular charge transfer dynamics in polar solvents, 67
Transition metal donor
photoinduced electron transfer in linked transition metal donor–acceptor complexes, 181
Triplet radical iron
kinetics of return intersystem electron transfer in triplet radical ion pairs in solution and on silica. Surface effect on bell-shaped energy-gap dependence, 137

Wavepacket dynamics
electron transfer rates from time-dependent correlation functions. Wavepacket dynamics, solvent effects, and applications, 87

^{3}ZnTPP*
kinetics of the electron transfer reaction between ^{3}ZnTPP* and methyl viologen in lecithin vesicles studied by global analysis, 149
